Fort Worth Markets - Daily Review.

Office of the Gazette, Fort Worth, Tex., Dec. 1, 1911.

Today's trade was heavy, especially in wholesale and retail groceries.

Fancy apples for the holidays are now in market at \$4.25 per barrel.

The offerings of turkeys, which are very fine this season, have been so heavy that the price is still lower.

The State of Trade.

Special telegrams to Bradstreet's record rather less activity in the movement of general merchandise, although at Chicago there has been an increasing volume of sales, particularly of dry goods, and in a less noteworthy degree at St. Paul, Milwaukee, Milwaukee and Burlington, a big aggregate of sales in staple lines has been curtailed, of course, by an intervening holiday. The restricted trading has been more conspicuous at Eastern centers, owing to the decline in the number of mail orders received, and to the notable absence of interior merchants. This is reported from St. Louis, Cincinnati, Philadelphia, New York and Boston. At New Orleans, also, general trade, while fairly satisfactory, is below late expectations.

Country merchants tributary to that market are not reported to be generally as prompt in payment as desired, and rebuffs, unable to get satisfactory prices for sugar, are storing their products. At Kansas City there is a fair active movement of general merchandise, but the total volume is less than that of a fortnight ago. The interior domestic money markets, as a rule, are not quite as firm as last week. At Chicago there is less demand for funds for manufacturing and commercial enterprises, but a larger demand for grain and other speculative ventures. At Cincinnati funds are flowing back from the country, and at Milwaukee they continue to go westward, but in diminished volume. The total volume of bank clearings at thirty-two cities for the current week, as specially wired by Bradstreet's in \$1,008,072,105, against \$1,108,188,307 last week, and \$1,053,865,012 in the fourth week of November, 1911. This shows a decline of about 8 1/2 per cent. five days this year against six days last week, and a decline of less than 2 1/2 per cent. with a holiday week this year as compared with a similar week a year ago. The decline as compared with last week is but 60 per cent. of that called for by the loss of one entire day's transactions, thereby pointing to a proportionate increase in the amounts transferred. The speculation in wheat, petroleum & railway shares continue at the full, while exports and imports of produce and manufactures remain of large proportions. The New York stock market is excited and strong, and under the stimulation of the settlement of the express war, the prospect of peace between Baltimore & Ohio and the Pennsylvania, with anticipated dividends on the Western Vanderbilt lines, speculation tends toward the trunk-line stocks, in which there is still much attention paid to the "fancy" and Southern stocks. The transactions of the week (five days) were 2,569,170 shares, against 2,635,925 shares in the week ending November 19, 2,857,885 shares in the same week of 1910, and 1,349,198 shares for the same week of 1911. Bonds were strong and advancing, with a total for the week of \$1,127,719,290, against \$1,111,600,000 last week, and \$1,212,147,000 the preceding week. Funds at New York are steady in spite of efforts to manipulate for higher rates; foreign exchange is slightly firmer. At Eastern centers the movement of dry goods has been disappointing. Prices in most lines are sustained, and the outlook for heavy-weight woolsens continues bright. Prints, however, have declined 1/2 cent from 5 1/2 to 5 1/4, after a month of extreme firmness. Stocks have increased of late. Raw wool is quiet, but tends to favor buyers, as concessions have been made to manufacturers wanting large lines. The market is rather less confident as to higher prices. Pig iron continues very firm, with no change in price. Steel rails are more active and more profitable to makers than has generally been made public, and prices are \$1 higher, at \$25.00 per ton. The special tobacco crop reported to Bradstreet's indicates that the western lead crop will aggregate about 235,000 hogheads, against 250,000 hogheads in 1910; that there has been a decline in the yield of about 30 per cent. in the bright Virginia and North Carolina leaf, and of about 15,000,000 pounds, or nearly 10 per cent. in the seed-leaf crop, mainly through the falling off in Wisconsin, speculatively breadstuffs trade is realizing more fully the long claimed strength of the statistical position of wheat, but thus far, in spite of that fact and continued heavy exports, the price of the cereal does not advance much. The total number of failures in the United States reported to Bradstreet's this week is 204, against 227 last week, 325 last year, 237 in 1910 and 232 in 1909, a decline as compared with all. Canada had 6 against 18 last week and 20 last year. The total failures in the country this year to date is 9162 against 10,000 last year, a decline of 844, against 9765 in 1910, 8350 in 1909 and 6487 in 1908. — [Bradstreet's.]

BITTER - 15c per lb. creamery 30c.

COFFEE - Rio, fair 15c; prime 16c; choice 18c; Laguayra 18c; Java 20c; Golden 15c; Pen Berry 16c.
